Team Member Workload Distribution

Name	Percentage of Contribution
Aanchal Singh	25
Deepak Kumar Swain	25
Sai Prasanna Gontyala	25
Sweta Kumari	25

Data Generation and Database setup

The group work was evenly distributed among the team members. Deepak, Prasanna and Aanchal worked upon getting the data sets. Sweta, Prasanna and Deepak worked upon setting upon the Azure environment. Transactional table and Watch_History table were explicitly created by all of us. We all worked upon cleaning data and organizing it in SQL server database.

Data Visualization using POWER BI and CRM

We have four dashboards with multiple reports covering different aspects of the data. Each report was responsible for one dashboard. After creation we all had peer reviews for each dashboard so that all of us are aware of each other's work and provide necessary feedback for better implementation of solution. Generation of lead and creating opportunities using CRM was handled by us.

We all have worked as a team and proactively taken up every task coming up on the way of completion. Each one of us was involved in every stage to some extent so that we are aware of end-to-end flow of the project and learn together.
